You are so skinny, you should probably eat as much as you can. said kemi

For all but the first few centuries of his 4000-year life, the Nubian Doro has struggled to build a new race of men. He has survived as a result of millennia of genetic mutations; his people exist as a result of nearly 4000 years of controlled breeding he has masterminded.

Now six of Doro's most promising "actives" have been drawn to the side of his chosen disciple, Mary. A young woman possessed of an unheard of power: the telepathic pattern that enables her to regenerate the mutilated discards of Doro's eugenics. A pattern that forces her into an inevitable struggle against the man who has been her father, her lover, and her master: Doro.

A frightening, chilling "pre-sequel" to Octavia Butler's first novel, *Patternmaster*.

Central and South America | Seed | Sun | The Mother of Invention

I rise to meet the occasion. My rising is a generosity that gives plenty to many so that they too may know the song of the earth and sun through their hands. Together we intentionally move the energy of creation forward. It is a powerful thing to choose to create again. Energy can be recycled in good faith and fun, for reserves don't stay trapped for too long. Where can you direct your powers of innovation?
